

We are willing to cooperate.

AstenGroup mission:

Create wow effect*

*positive experience

AstenGroup view:

Unique brands gathering

AstenGroup is developing due to modern management and is particularly focused on the high level of customer service.

Ladies and Gentlemen

My company „Asten Group” Sp. z.o.o. exists on the polish market since over 10 years. We are cooperating with well-known manufactures: distributing their products and also providing service and marketing. Currently we are focusing on 3 brands which we created, successfully introduced on the market and still improving.

We gained knowledge and experience, we created modern organizational structure and we developed our facilities. We want to use our potential within next few years to introduce new brands on the market.

We are open for any cooperation with Foreign Companies interested in sale of their products in Poland but also in Europe and we are looking for reliable and successful partners.

We are ready for such a cooperation.

Best Regards

Asteniusz Myśliwiec

President of Asten Group Sp. z o.o.
Owner

Our experience

Products which are distributed by our brands come from different, mainly foreign, manufactures. For several years our company worked successfully with Chinese manufacturers of equipment - Haitian and Shini.

Plastigo is sole distributor of Haitian injection molding machines in Poland. In 2010, our sales of the Haitian machines were ranked as the first in Europe.

ShiniEurope is European warehouse and logistics center of Shini - Chinese manufacturer of auxiliary equipment - for the plastics industry across whole Europe. In 2010 we received the status of „Overseas Sales Leader” of Shini.

Brands of AstenGroup

Plastigo - distributor of injection molding machines and auxiliary equipment for the plastics industry.
